

MORZSA, LÁSZLÓ, iASK

László Morzsa is a software and data engineer who has been working as a research fellow at the Big Data Centre of the Institute of Advanced Studies Kőszeg since January 2016. Before he joined iASK, he had been involved in developing Geographical Information Systems at the GeoX Kft. from 2009 onwards. In 2005, he started BSc studies in Engineering Information Technology at Óbuda University, then he continued as a part-time student by pursuing Software technology specialization that he completed at the University of Dunaújváros in 2011 while working in full-time.
